Protect your valuable information

CYBER INSURANCE

Cyber incidents or security breaches can have a financial impact on your business.

To keep your business running; GIG has developed customisable Cyber Insurance Plans to suit your business.

With six price plans to choose from, our multi-cover insurance plan is simple and flexible, covering:

- Breach of information
- Privacy or data protection violation
- Unauthorised access
- Wrongful use of IT assets
- Transmission of any unauthorised software or computer virus

GIG Cyber Insurance Plans cover all of these risks and offer services that ensure:

- Data restoration
- Repair and/or restoration of software
- Protection of your corporate reputation
- Forensic services

Your business growth reflects your success; here are the best practices to protect your information security:

- Have a dedicated individual, responsible for information security and privacy.
- Have restrictions on sensitive data (including physical records) to only those requiring such access.
- Prompt users to change their passwords automatically at least every 90 days.
- Have a process in place to immediately delete system access after terminating employment or third parties contracts.
- Have written information security policies and procedures that are reviewed annually and communicated to all employees including information security awareness training.

- Use anti-virus, anti-spyware and anti-malware software.
- Use firewalls and other security applications on all external gateways.
- Use intrusion detection systems or intrusion prevention systems and these are monitored.
- Immediately update anti-virus, anti-malware and all other security protections following the release of updates /patches.

Be assured in the case of a cyber-attack that GIG's team of dedicated cyber security experts will be ready to assist you 24/7.
